2. environment
1 A. An area where weather and climate have no effect on living things
 B. The surroundings in which people, plants, or animals live
 C. An area where plants grow freely
 D. A warm, rainy area
3. climate
1 A. The pattern of weather of an area over a long period of time
 B. The changes in temperature over a period of a month or more
 C. The day-to-day weather of an area
 D. Distance from the equator
4. conservation
1 A. The careful use of natural resources
 B. The misuse of our environment
 C. The dirt that gets into air or water
 D. Anything in the environment that people use
5. fuel
1 A. Any renewable resource
 B. Any nonrenewable resource
 C. Anything that pollutes the air
 D. Anything that creates heat or energy
6. elevation
1 A. Distance from the equator
 B. The surroundings in which people, plants, or animals live
 C. The changes in temperature over a period of a month or more
 D. Height of a landform in relation to sea level

-
- $\frac{1}{1}$ 7. precipitation
- A. The pattern of weather of an area over a long period of time
 - B. Moisture that falls to the ground as rain, sleet, or hail
 - C. Anything that pollutes the air
 - D. The study of transportation
- $\frac{1}{1}$ 8. basin
- A. A large, bowl-shaped area surrounded by higher land
 - B. A warm, rainy area
 - C. A large, flat area of land
 - D. A small hill surrounded by mountains
- $\frac{1}{1}$ 9. natural resource
- A. Anything that creates heat or energy
 - B. Something found in the environment that people can use
 - C. An area where plants grow freely
 - D. Anything that pollutes the air
- $\frac{1}{1}$ 10. recycle
- A. Any non-renewable resource
 - B. The misuse of our environment
 - C. To use something again instead of throwing it away or discarding it
 - D. The study of transportation

$\frac{3}{3}$ 11. Name three different landforms that are found in the United States.

$\frac{1}{1}$ 12. Name a mountain range in the United States.

$\frac{1}{1}$ 13. What is pollution?

$\frac{1}{1}$ 14. Name one of the three major factors that affect climate.

$\frac{2}{2}$ 15. What is a canal, and how is it not the same as a river?
